ABOUT ME

Full Stack Developer passionate about continuously learning new skills and technologies to **solve real-world problems** through creativity and innovation. Skilled in frontend and backend development, UI/UX design, database management, APIs, and application development, with a focus on building scalable, responsive, and user-friendly solutions. **I enjoy transforming ideas into practical applications** by combining technology, creativity, and problem-solving while constantly exploring new tools and technologies to grow as a developer.

EDUCATION

(2024 - 2028)

KARUNYA INSTITUTE OF TECHNOLOGY AND SCIENCES (DEEMED UNIVERSITY)

B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning)

PROJECTS

DATABASE MANAGEMENT WEBSITE

HTML , CSS , JS , FIREBASE

- Developed a web-based Database Management System with an intuitive interface for efficiently creating, managing, updating, and retrieving structured data.
- Integrated Firebase for real-time database management, secure data storage, and seamless synchronization between the application and backend.

AUTONOMOUS MOBILE ROBOT

REACT , TYPESCRIPT , BLENDER

- Developed an autonomous mobile robot for university by integrating **Intelligent Robotics** and **Computer Vision** for real-time environment perception and autonomous navigation.
- Implemented computer vision-based object detection and obstacle avoidance, enabling the robot to analyze its surroundings and make autonomous movement decisions.

WORK EXPERIENCE

2026 - NOW

FULL STACK DEVELOPER | INDEPENDENT

Independent Full-Stack Developer, building responsive and user-friendly web applications based on project requirements. Focused on combining development, UI/UX, and modern technologies to create practical solutions.

- Developed and managed web applications using frontend, backend, databases, and APIs.
- Independently handled project requirements, development, and delivery to create creative, scalable, and real-world solutions.

JUNE 2026

PYTHON DEVELOPMENT INTERN | @SWIFTANT

Worked on Python-based application development, applying object oriented programming principles to build structured and maintainable solutions. Gained practical experience in debugging, problem-solving, and writing efficient code.

- Developed Python applications using Object-Oriented Programming (OOP) principles.
- Strengthened debugging, problem-solving, and software development skills through hands-on projects.

TECHNICAL SKILLS

Programming Languages: Python, Java , Typescript

Web Technologies: HTML, CSS, React

Database: SQL

Tools: GITHUB, ANTIGRAVITY

Design & Media: Adobe Premiere Pro , Adobe After Effects, Photography, Video Editing,Blender
